Ding3000 thought to themselves: "Mother Nature is still the best designer in the world" and began copying her most fascinating creations, including floating Afghan hounds, shy giraffes, greedy chicks and not-at-all stubborn mules.

2 Oderda table

An embedded joint in the edge of the table top that can support any add-on component, ranging from table legs to a drawer or files. Each item can be assigned to an individual position. Thus, additional elements increase the table's tidiness even though it appears less tidy.
